Contents

Volume 17

1 Invited Review
Implementations of special ordered sets in MP software
W. Hummeltenberg

16 Heuristics—the relational approach
R.S. Stainton and D.B. Papoulias

21 On the quality of heuristic solutions to a 19×19 quadratic assignment problem
P.A. Bruijs

31 A graphical method to solve a family of allocation problems
R.V.V. Vidal

35 Estimating most productive scale size using data envelopment analysis
R.D. Banker

45 Optimal control of greenhouse climate: methodology
S. Gal, A. Angel and I. Seginer

57 Optimal control of a dam under seasonal electricity prices
L. Cantaluppi

71 Reliability of repairable redundant systems in nuclear generating stations
S.H. Sim and L. Wang

79 Short-term forecasting of electricity demand by decomposition analysis
T.N. Goh and S.S. Choi

85 On a special class of bicriterion path problems
E.Q.V. Martins

95 An automatic procedure for Box–Jenkins model building
G. Libert

104 Parmeterisation algorithms for the integer linear programs in binary variables
E. Loukakis and A.P. Muhlemann

116 A note on the multidimensional dual
J. Ignizio

123 An equivalent subproblem relaxation for improving the solution of a class of transportation scheduling problems (*Short Communication*)
F. Glover, D. Klingman and N. Phillips

125 On a stochastic extension of the EOQ formula (*Short Communication*)
M.F. Friedman

128 Rejoinder to "A note on Galvao's a graph theoretical bound for the *p*-median problem" (*Short Communication*)
R.D. Galvão

129 Book Reviews

138 EURO Bulletin

141 Invited Review
Trends in nonlinear programming software
P.E. Gill, W. Murray, M.A. Saunders and M.H. Wright

150 Statistical analysis of steady-state simulations: survey of recent progress
J.P.C. Kleijnen

163 The effect of using discrete time units in queuing simulation
H.-S. Lau and A. Zaki

169 A thermodynamically motivated simulation procedure for combinatorial optimization problems
R.E. Burkard and F. Rendl

175 Simple approximations for the reorder point in periodic and continuous review (s, S) inventory systems with service level constraints
H.C. Tijms and H. Groenevelt

191 On the safety stock problem for random delivery processes
P. Kelle

201 Lower bounds for the economic lot scheduling problem using aggregation
S. Axsäter
207 Deterministic lot-sizing for coordinated families of production/inventory items
A.K. Chakravarty
215 The time spent in a dynamic job shop
J.G. Shanthikumar and J.A. Buzacott
227 Multi-stage production with variable lot sizes and transportation of partial lots
Z. Drezner, A.Z. Szendrovits and G.O. Wesolowsky
238 Algorithms for two-machine flow-shop sequencing with precedence constraints
C.N. Potts and A.M.A. Hariri
249 Inspection and maintenance optimization methods
K.M. Mjelde
257 Parts and service demand distribution generated by primary production growth
J. Keilson and P. Kubat
266 Expected demand for service parts when failure times have a Weibull distribution
L. Fortuin
271 Book Reviews
280 EURO Bulletin

283 Invited Review
Stochastic control theory and operational research
R. Neck
302 Regional energy supply optimization with multiple objectives
V. Schulz and H. Stehfest
313 A five facets frame for the design of heuristics
H. Müller-Merbach
317 A five facets frame for the design of heuristics—A rejoinder
R.S. Stainton
320 Interactive multiobjective decisionmaking for nonconvex problems based on the penalty scalarization functions
M. Sakawa and N. Mori
331 Departmental full costing via goal programming models
Y. Badran
338 Aggregation and disaggregation in hierarchical production planning
S. Axsäter and H. Jönsson
351 A dynamic production planning and scheduling algorithm for two products processed on one line
M.J. Liberatore
361 Cross decomposition applied to the stochastic transportation problem
K. Holmberg and K.O. Jörnsten
369 Grouping multi-item inventory using common cycle periods
V. Aggarwal
373 Inventory control with the gamma probability distribution
R.D. Snyder
382 A summary of discrete replacement policies
T. Nakagawa
393 Discrete resource allocation with tree constraints by an incremental method
K.M. Mjelde
401 On diagonally preconditioning the truncated Newton method for super-scale linearly constrained nonlinear programming
L.F. Escudero
415 Letters to the Editor
P.H. Zipkin / L.G. Vargas
417 Book Reviews
425 EURO Bulletin
427 Contents Volume 17
